Parrot AR Done 2.0 Quadcopter RTF

What could be more exciting than a hobby shop sidewalk sale? We had a great time with our sidewalk sale (despite Mother Nature's best efforts to drench us). Lots of folks stopped by and enjoyed the wide variety of items that were offered at 50% off. And Master modeler/chef Murph was serving up a delicious lunch of hot dogs, chips, drinks, and ice cream. So what could be more exciting than a hobby shop sidewalk sale? How about The Smoke Stack Hobby Shop's very first You Tube commercial?

Yes, we are now stars in our very own commercial that highlights many of the services we have to offer. And if you have ever visited us in person, you should be aware by now that we certainly do not take ourselves too seriously. Check out the commercial at [http://www.smokestackhobby.com/..](http://www.smokestackhobby.com/) Hopefully it puts a smile on your face and entices you to visit us in person and get an autograph from one of our "Super Professionals" ☺

Patti and I were able to get away for a Sunday drive down to Rio Grande, OH, famous as the home of Bob Evans. The flying clubs of the R/C Aces out of Jackson, OH and the R/C Mountaineers out of Charleston, WV hosted a non-competitive fly-in and scale flying event. Our own Butch and his wife Brenda were there as members of the Flying Forks Club of Lancaster, OH. Butch was not able to get his large plane ready to fly in time for the event (see our commercial and you'll know why), but we all had a great time watching some beautiful, large-scale planes put through their paces.

MTH Passenger Station..

Current Events

- Come visit us this month as we continue to mark selected items way down to make room for the Fall arrivals.

NEW ARRIVALS

Last month we presented the 1SQV-Cam quad-copter. This little bird has a camera built in that lets you take video and still photos right from the throttle. This month, we have the Parrot AR Drone 2.0. This is the next step in drone technology. You can fly this baby right from your iPad, iPhone, or Android smartphone. It's so easy that even Murph, who has never flown a 'copter before, could take off and hover with no training. Simply touch a button on your screen to launch the drone and it will take off and hover about 3 feet off the ground and wait for you. It has real-time video feed back to your device so you can fly around your house simply be watching your screen. It has built in WiFi that attaches to your phone or tablet. If you lose WiFi connectivity it will stop and wait for you. It even has a button to land it. Two cameras provide GPS features along with HD video. Real-time feedback on your screen tells you battery level, speed, and altitude.

In plastics we have the awesome new B-25J Mitchell and B17G Flying fortress from HK Models, both in 1/32 scale. These are both large and impressive airplanes. We also have the Vought F4U-1 Corsair in the "Birdcage" version from Tamiya. And finally we have the T-80U Russian Battle tank from Xact.

Railroading

With train season fast approaching we are busy getting stocked up in all of our scales. The latest arrivals are a large selection of scenery accessories from Grand Central Gems, including their large scale ghost town and cabin with Smokey Bear! We also have a beautiful G Scale 4-4-0 American type engine, the Jupiter, from Hartland. And finally the Passenger Station from MTH has arrived.
